

Création branch

git checkout -b num-branchName

Push de la branch

git push origin num-branchName

Récupération branch d'un autre

git fetch origin

git checkout -b num-branchName origin/num-branchName

Commit le plus souvent possible

git add [-A] .

git commit -m «[num] explication»

Push de nos dev

git push origin num-branchName

Récupération des dev sur la branch

git pull --rebase origin num-branchName

Suppression branch locale

```
git branch -d num-branchName
```

Suppression branch distante

```
git push origin :num-branchName
```

Clean branch

```
git fetch -p
```

Update branch locale

git rebase master

Merge branch locale

git merge --no-ff num-branchName
